KIDS RENEE SHOW

Renée's Fun Felt Projects

Cut • Make • Play!

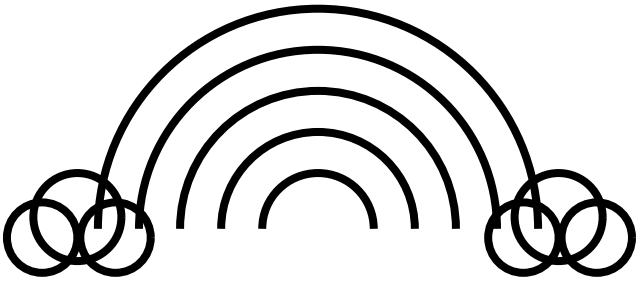

Little hands can choose, match and stick.

Grown-up supervision recommended for all activities.

Felt Rainbow

An adult cuts the felt; little helpers choose the colours.

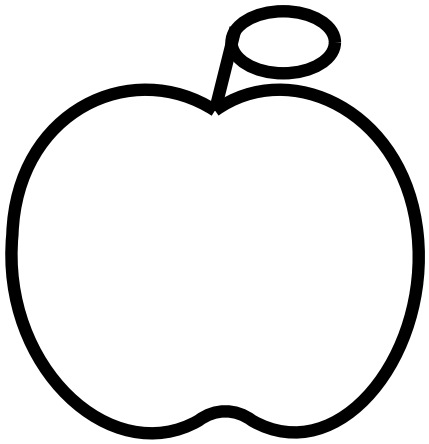

YOU NEED: felt, child-safe glue and this printed template.

GROWN-UP: trace the rainbow bands onto felt and cut them out.

LITTLE HELPER: place the bands in order and press gently.

Felt Apple

Make a red, green or yellow apple.

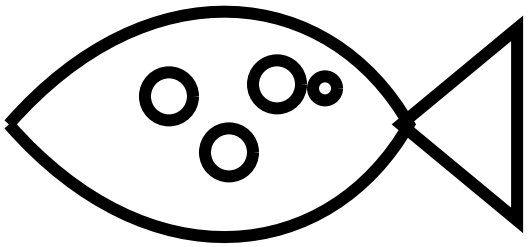

Cut one large apple, one leaf and one stem from felt.

An adult handles scissors. Use a child-safe glue stick.

Felt Fish

Choose two colours and make a fish friend.

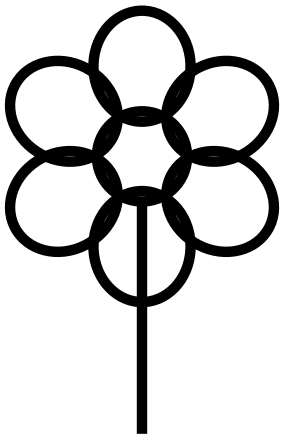

Cut the fish body and tail from felt; add large fins.

Try big felt shapes instead of small decorations.

Felt Flower

Make a flower with a big middle and six petals.

Trace the flower shape. Choose a different colour for the centre.

Little helpers can sort the petals and help place them.

Grown-up Safety Check

A few simple reminders before craft time.

- 1. An adult should supervise the activity from start to finish.
- 2. Adults handle scissors, craft knives, needles, hot glue and sharp tools.
- 3. Use age-appropriate, non-toxic materials and follow product labels.
- 4. Keep small parts (buttons, beads, googly eyes, magnets and tiny felt pieces) away from children under three a
- 5. Use large felt shapes; avoid loose decorations that could become choking hazards.
- 6. Let your child choose, sort, match and press. The finished craft does not need to be perfect.
